SenDiTour

Participation in tourism as an effective form of increasing the educational and social activity of people with a sensory disability

SenDiTour Project Reaches Half-way

‘Participation in tourism as an effective form of increasing the educational and social activity of people with a sensory disability’.

Project Partners:

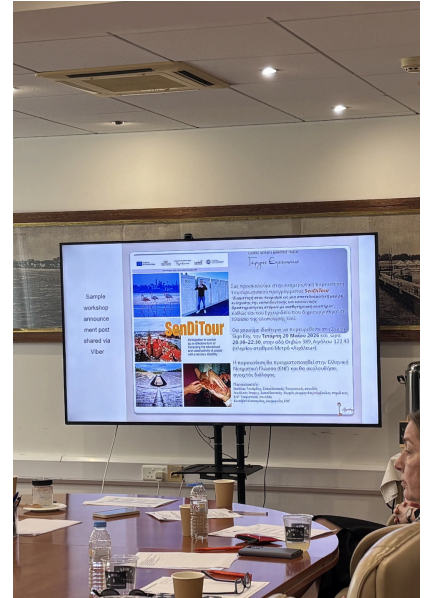

Dobre Kadry (Poland)
Hellenic Institute of Sign Language (Greece)
Larnaka Tourism Board (Cyprus)

The third Transnational Project Meeting was held in Larnaka, Cyprus on May 24-26, 2026, hosted by partner Larnaka Tourism Board.

The meeting extensively covered the project progress, which is excellent at the half-way mark, and adhering to schedule.

This includes the content for the workshops and manuals for persons with a sensory disability (two target groups: Deaf persons and Blind persons); the Sign Language dictionary, and the proposed trips for visitors with a sensory disability that will take place next spring.

On Day 2, the project was honoured to welcome Christos Misos - the first totally blind competitive archer from Cyprus; Cypriot World Champion para-archer and World No. 1 in the VI1 category, along with Mrs Yiota Armeni, President of the Local Welfare Association for the Blind (Livadia, Voroklini, Pyla, Kelia, Troulloi).

A very fruitful discussion was held regarding the obstacles that blind persons face for travel and tourism with many valuable insights.
